### **Management Report (Unaudited)**

Management is responsible for the preparation, integrity, and objectivity of the consolidated financial statements of the Authority, as well as all other information contained in the Annual Report. The consolidated financial statements have been prepared in conformity with U.S. generally accepted accounting principles (“U.S. GAAP”) and, in some cases, reflect amounts based on the best estimates and judgments of management, giving due consideration to materiality. Financial information contained in the Annual Report is consistent with the financial statements.

The Authority maintains a system of internal controls to provide reasonable assurance that transactions are executed in accordance with management’s authorization, that financial statements are prepared in accordance with U.S. generally accepted accounting principles, and that the assets of the Authority are properly safeguarded. The system of internal controls is documented, evaluated, and tested on a continuing basis. No internal control system can provide absolute assurance that errors and irregularities will not occur due to the inherent limitations of the effectiveness of internal controls; however, management strives to maintain a balance, recognizing that the cost of such a system should not exceed the benefits derived.

The Authority maintains an internal auditing program to independently assess the effectiveness of internal controls and to report findings and recommend possible improvements to management. This program includes a comprehensive assessment of internal controls to ensure that the system is functioning as intended. Additionally, as part of its audit of the Authority’s consolidated financial statements, KPMG LLP, the Authority’s independent auditors, considers internal controls over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Authority’s internal controls over financial reporting. Management has considered the recommendations of its internal auditors, the Office of the State Comptroller (“OSC”), and the independent auditors concerning the system of internal controls and has taken actions that it believed to be cost-effective in the circumstances to respond appropriately to these recommendations. Based on its structure and related processes, management believes that, as of December 31, 2024 and 2023, the Authority’s system of internal controls provides reasonable assurance related to material items, as to the integrity and reliability of the financial statements, the protection of assets from unauthorized use or disposition and the prevention and detection of fraudulent financial reporting.

The members of the Authority’s Board of Trustees (the “Authority’s Trustees”) are appointed by the Governor, by and with the advice and consent of the Senate. The Authority’s Trustees’ Audit Committee meets with the Authority’s management, its Senior Vice President of Internal Audit, and its independent auditors periodically, throughout the year, to discuss internal controls and accounting matters, the Authority’s financial statements, the scope and results of the audit by the independent auditors and the periodic audits by the OSC, and the audit programs of the Authority’s internal auditing department. The independent auditors and the Senior Vice President of Internal Audit have direct access to the Audit Committee.
