Introduction

This “2024 Report to the Governor and Legislative Leaders on Power Programs for Economic Development” (“Report”) is submitted by the Power Authority of the State of New York (the “Authority” or “NYPA”) pursuant to Public Authorities Law (“PAL”) §§ 1005(18), (23) and (24)(e).

Subdivision 18 provides:

18. For the purpose of furnishing the state with systematic information regarding the status and the activities of the authority, the authority shall submit to the governor, the president of the senate, speaker of the assembly, the minority leader of the senate and the minority leader of the assembly, within ninety days after the end of its fiscal year, a complete and detailed annual report on each economic development power program it administers. Such annual report shall include, but not be limited to, the following information:

a. the number of recipients of economic power program benefits, the economic region in which each recipient is located, the type and amount of assistance provided, megawatts of power awarded, length of current contract, current contract compliance status, last audit, number of jobs retained and/or added in the fiscal year, approximate energy efficiency savings and amount of power reallocated from previous years due to forfeited benefits; and ¹

b. cost to the authority to provide economic development power programs during the previous fiscal year.

Subdivision 23 provides:

23. The authority shall include in the annual report prepared pursuant to subdivision eighteen of this section, an accounting for the subject year that provides (a) the amount of expansion power and replacement power sold into the wholesale market by the authority, and (b) the net earnings, as such term is defined in section one hundred eighty-nine-a of the economic development law, paid into the western New York economic development fund.²

Paragraph (e) of subdivision 24 provides:

(e) The authority shall include in the annual report prepared pursuant to subdivision eighteen of this section, an accounting for the subject year that provides the amount of St. Lawrence County economic development power sold into the wholesale market by the authority, and the net earnings paid into the northern New York economic development fund.

To simplify the presentation of the information required by PAL § 1005(18), (23) and (24)(e), the Authority has combined the reporting requirements of these statutory provisions in this Report.

¹None of the statutes authorizing the programs discussed in this Report require a program participant to establish energy efficiency savings in connection with the receipt of power under the program. Therefore, the Authority is unable to report on this specific information.

²PAL § 1005(14) calls for reporting on the status of “economic development power,” a program created by Chapter 32 of the Laws of 1987 which was, in the program’s later years, supported with market-based power. Components of that program were allowed to expire or were repealed in view of the creation of the ReCharge New York Power program in 2011. Therefore, the economic development power program is no longer administered. Accordingly, there is no information to report on economic development power in response to PAL § 1005(14).

A. ReCharge New York Power

Program Details

Chapter 60 (Part CC) of the Laws of 2011 (“Chapter 60”) created the ReCharge New York (“RNY”) Power program. The RNY Power program makes 910 megawatts (“MW”) of “ReCharge New York Power” (“RNY Power”) available to “eligible applicants” for the purpose of attracting new businesses and retaining and expanding existing businesses throughout the state of New York.

The RNY Power resource is comprised of: (1) fifty percent (50%) of firm hydroelectric power from the Authority’s Niagara and Saint Lawrence-FDR hydroelectric projects (“RNY Hydropower”) that was withdrawn, effective August 1, 2011, from the utility corporations that had purchased such power for the benefit of domestic and rural consumers; and (2) fifty percent (50%) of power procured by the Authority through market sources, a competitive procurement process, or Authority sources (other than the Niagara and Saint Lawrence projects) (collectively, “RNY Market Power”).

Pursuant to Chapter 60, the Authority was authorized, as of July 1, 2012, to “make available, contract with and sell” to eligible applicants such RNY Power allocations as are recommended by the Economic Development Power

ReCharge New York customer **Tempco Glass Fabrication LLC** in Flushing, New York, was awarded 626 kilowatts of low-cost power in exchange for commitments of 67 jobs and \$2.5 million in capital spending.

Allocation Board (“EDPAB”). RNY allocations consist of equal parts of RNY Hydropower and RNY Market Power.

Projected Availability

As of December 31, 2024, a balance of 38.7 MW of RNY Power was available for allocation to eligible applicants.³

Current Allocations

As of December 31, 2024, the Authority approved 889 allocations of RNY Power had been approved by the Authority for 762 eligible applicants totaling 871.3 MW. All current RNY Power awards, including recipient name, location, region, MW of power awarded, length of current contract, and total number of jobs committed to be retained or added are listed in Exhibit 1 to this Report. All program statistics include pending, suspended, and in-service allocations.⁴

In 2024, Authority staff conducted a cost savings analysis for RNY customers for the period of January 1, 2023, to December 31, 2023. It was determined that RNY Power allocations collectively provided program participants an estimated cost benefit of nearly \$83 million. The estimated cost benefits are based on a comparison of the cost of RNY Power versus the local electric utility standard tariff rates, reflecting estimated commodity and delivery costs.

Precision Label Corporation, a ReCharge New York customer, retains 44 jobs at its Hauppauge facility and created an additional 2 jobs during their \$250K expansion project. NYPA supported the project with two ReCharge New York allocations totaling 176 kilowatts.

³ This amount of unallocated RNY Power may not be available to all eligible applicants. The underlying statute specifies set-asides and caps on the amount of RNY Power that may be allocated for purposes of business retention and expansion, and certain categories of eligible applicants (e.g., small businesses and not-for-profit corporations). See Economic Development Law § 188-a(c)(4).

⁴ Examples of pending allocations include awarded allocations that (i) have not yet been addressed in a contract between NYPA and the awardee, and (ii) have been addressed in such a contract, but not yet placed into service by the awardee.

As of the end of 2024, the RNY Power program was supporting the retention and/or creation of 415,235 jobs.⁵

Compliance Information

In 2024, Authority staff conducted its twelfth annual compliance review of customers receiving power allocations under the RNY Power program for the reporting period from July 1, 2022, through June 30, 2023. The compliance review examined RNY Power customer contract compliance in three areas: (1) job retention; (2) capital investment; and (3) power utilization (the “Supplemental Commitment Areas”). All RNY customers included in this compliance review reporting period received RNY Power for an entire 12-month period and thus were able to be evaluated in the Supplemental Commitment Areas.

The underlying RNY Power contract specifies the customer’s commitments for job retention, capital investment and power utilization (collectively, the “Supplemental Commitments”). The Authority may reduce a customer’s RNY Power allocation and contract demand if the customer fails to achieve at least a 90% compliance rate for a specific Supplemental Commitment.

Some customers have pointed to a number of business/employment-related challenges as reasons for non-compliance, including the lingering effects of the COVID-19 pandemic and the difficulties in hiring and maintaining employees due to challenging labor market conditions.

Seviroli Foods, Inc. receives 1,050 kilowatts of low-cost ReCharge New York Power at its Hauppauge facility in exchange for 15 new jobs and a capital investment commitment of \$1M.

Based on these conditions, the Authority enforced the Supplemental Commitment Areas at a 90% level for the RNY Power program for this compliance review reporting period. Where the Authority took compliance action against non-compliant customers, it also adjusted the Supplemental Commitments of such customers in light of the reductions made to the power allocations and contract demands of such customers.

As a result of compliance action taken for this compliance review reporting period, the Authority reduced power allocations and contract demands for 20 RNY Power customers, resulting in a total allocation reduction of 3.4 MW.

Forfeiture and Reallocation

The amount of power forfeited during the reporting year is approximately 15.9 MW.⁶ This amount reflects customers who did not seek to extend the term of their power allocation, resulting in the allocation’s expiration or those customers who voluntarily left the program. This amount does not include reductions from compliance related action, due to the jobs and/or capital investment adjustments

Burly Brothers Land and Cattle Company L.L.C. was awarded 50 kilowatts of ReCharge New York Power for its Attica site in exchange for commitments of 5 new jobs and nearly \$1.5M in capital spending.

⁵ The total number of jobs across all programs and accounting for the fact that jobs may be the result of more than one program is 450,795 jobs.

⁶ For purposes of this report, the Authority is interpreting the term “forfeited” to mean any instance of surrender of previously allocated power whether due to a lack of need for any portion of an allocation, a reduction in the business operations of a customer, or some other reason.

“We are thrilled to expand Tempco’s capabilities with the support of the NYPA’s ReCharge NY program,” said Tempco Glass Fabrication President Johnson Chen. “This allocation of low-cost power allows us to invest in advanced glass processing technologies, further enhancing our ability to deliver energy-efficient, high-quality architectural glass products to our customers. As a family-owned, minority-owned business, Tempco remains committed to fostering local job creation, innovation, and sustainability. We are proud to partner with NYPA as we continue to grow.”

mentioned above. This amount also does not include reductions in power in the extension process due to the reduction of jobs and/or capital investment. It is not possible to identify precisely what portion of forfeited power was reallocated because at any given time during the reporting year there is some amount of unallocated power.

B. Western New York Hydropower: Expansion Power and Replacement Power

Program Details

Under PAL § 1005(13), the Authority is authorized to contract, allocate or reallocate directly, or by sale for resale, 250 MW of firm hydroelectric power as “Expansion Power” (“EP”) to eligible businesses in the state located within 30 miles of the Niagara Power Project, provided that the amount of EP allocated to businesses in Chautauqua County on January 1, 1987, continues to be allocated in such county. “Replacement Power” (“RP”) consists of 445 MW of firm hydropower generated by the Authority at its Niagara Project in accordance with PAL § 1005(13). RP is available to eligible businesses with facilities located within 30 miles of the Niagara Power Project.

Projected Availability

As of December 31, 2024, a balance of 55.2 MW of EP and a balance of 43.3 MW of RP was available for reallocation to eligible businesses.

Current Allocations

As of December 31, 2024, 105 allocations of EP had been approved by the Authority totaling 194.8 MW. All current EP allocations, including recipient name, location, region, MW of power awarded, length of current contract, current contract compliance status and total number of jobs committed to be retained and/or added are listed in Exhibit 2 to this Report. All program statistics include pending and in-service allocations.

As of December 31, 2024, 140 allocations of RP had been approved by the Authority totaling 401.7 MW. All current RP allocations, including recipient name, location, region, MW of power awarded, length of current contract, current contract compliance status and total number of jobs committed to be retained and/or added are listed in Exhibit 2 to this Report. All program statistics include pending and in-service allocations.

As of the end of the 2024 calendar year, the EP and RP program was supporting a total of 35,904 jobs.⁷

ReCharge New York customer *Twin Star Orchards, LLC* in New Paltz, New York was awarded 96 kilowatts of low-cost power in exchange for commitments of 8 jobs and \$3.25M in capital spending.

⁷ The total number of jobs across all programs and accounting for the fact that jobs may be the result of more than one program is 450,795 jobs.

Mayer Bros. Apple Products Inc. was awarded a Replacement Power allocation of 210 kilowatts at its West Seneca site, committing to 289 jobs and spending up to \$1.6M in capital investments. Mayer Brothers currently utilizes two allocations in West Seneca, 376 kilowatts of ReCharge New York Power and 200 kilowatts of Expansion Power. Their most recent expansion project is anticipated to be completed this year.

Compliance Information

In 2024, Authority staff conducted its annual compliance review of customers receiving hydropower under the EP and RP Program covering the reporting period of January 1, 2023 through December 31, 2023. The compliance review examined contract compliance in the Supplemental Commitment Areas.

The underlying EP and RP Power contract specifies the customer's commitments for job retention, capital investment and power utilization (collectively, the "Supplemental Commitments"). The Authority may reduce a customer's EP and/or RP Power allocation and contract demand if the customer fails to achieve at least a 90% compliance rate for a specific Supplemental Commitment.

All EP and RP customers included in this compliance review reporting period received EP and/or RP for an entire 12-month period and thus were able to be evaluated for compliance.

As it did with the RNY Power Program, in response to business/employment-related challenges the Authority enforced Supplemental Commitments of the EP and RP customers at a 90% level for this specific compliance review

reporting period. Where the Authority took compliance action against non-compliant customers, it also adjusted the Supplemental Commitments of such customers in light of the reductions made to the power allocations and contract demands of such customers.

As a result, the Authority reduced power allocations and contract demands for 4 EP and RP customers. The total allocation reduction was .85 MW.

Forfeiture and Reallocation

The amount of power forfeited during the reporting year was approximately 8.4 MW.⁸ This amount does not include reductions from compliance-related action, due to the jobs and/or capital investment adjustments mentioned above.

It is not possible to identify precisely what portion of forfeited power was reallocated because at any given time there is always some amount of unallocated power. Comparing the total amount of power allocated as of the close of the reporting year with the total amount of power allocated as of the close of the previous year may provide a rough indication of allocation trends although such information may not account for changes in allocation levels that occur within a particular reporting year.

C. Preservation Power

Program Details

Chapter 313 of the Laws of 2005 established the "Preservation Power" ("PP") program providing for the sale of 490 MW of St. Lawrence-FDR Power Project hydropower to eligible businesses within the counties of Jefferson, St. Lawrence, and Franklin Counties.

Projected Availability

As of December 31, 2024, a balance of 122.8 MW of PP was available for reallocation to eligible businesses.

Current Allocations

As of December 31, 2024, 14 allocations of PP to 12 companies had been approved by the Authority totaling 367.2 MW. All current PP allocations, including recipient name, location, region, MW of power awarded, length of current contract, current contract compliance status and total number of jobs committed to be retained and/or added

⁸ For purposes of this report, the Authority is interpreting the term "forfeited" to mean any instance of surrender of previously allocated power whether due to a lack of need for any portion of an allocation, a reduction in the business operations of a customer, or some other reason.

are listed in Exhibit 3 to this Report. All program statistics include pending and in-service allocations.

As of the end of the 2024 calendar year, the PP program was supporting a total of 2,178 jobs.⁹

Compliance Information

In 2024, Authority staff conducted an annual compliance review of customers receiving hydropower under the PP Program covering the reporting period of January 1, 2023 through December 31, 2023. The compliance review examined contract compliance in the Supplemental Commitment Areas.

The underlying PP contract specifies the customer's commitments for job retention, capital investment and power utilization (collectively, the "Supplemental Commitments"). The Authority may reduce a customer's PP allocation and contract demand if the customer fails to achieve at least a 90% compliance rate for a specific Supplemental Commitment.

Empire State Mines, LLC is a Northern New York customer with a 2,000 kW Preservation Power allocation in exchange for 100 new jobs and \$33.8M in capital investments. The company was also awarded a Northern New York Power Proceeds award of \$330,000.

All PP customers included in this compliance review reporting period received PP an entire 12-month period and thus were able to be evaluated for compliance.

All the customers were found to be in compliance for this specific compliance review reporting period, and therefore no compliance action was taken.

Forfeiture and Reallocation

There was no power forfeited during this specific compliance review reporting period for noncompliance or other reasons.

D. High Load Factor Power

Program Details

The High Load Factor Power ("HLF") program provides for the allocation of power to energy-intensive industries. HLF power is sourced from the market.

Current Allocations

As of December 31, 2024, twelve allocations of HLF power are currently allocated totaling 825.8 MW. These HLF allocations are listed in Exhibit 4 to this Report. All program statistics include pending and in-service allocations.

Compliance Information

In 2024, Authority staff conducted an annual compliance review of customers receiving power under the HLF program covering the reporting period of January 1, 2023 through December 31, 2023. The compliance review examined contract compliance in the Supplemental Commitment Areas.

All HLF customers included in this compliance review reporting period received HLF for an entire 12-month period and thus were able to be evaluated for compliance.

All the customers were found to be in compliance for this specific compliance review reporting period, and therefore no compliance action was taken.

Forfeiture and Reallocation

The amount of power forfeited during the reporting year was approximately 40 MW.¹⁰

⁹ The total number of jobs across all programs and accounting for the fact that jobs may be the result of more than one program is 450,795 jobs.

¹⁰ For purposes of this report, the Authority is interpreting the term "forfeited" to mean any instance of surrender of previously allocated power whether due to a lack of need for any portion of an allocation, a reduction in the business operations of a customer, or some other reason.

It is not possible to identify precisely what portion of forfeited power was reallocated because at any given time there is always some amount of unallocated power. Comparing the total amount of power allocated as of the close of the reporting year with the total amount of power allocated as of the close of the previous year may provide a rough indication of allocation trends although such information may not account for changes in allocation levels that occur within a particular reporting year.

E. Expansion Power Net Revenues for Industrial Incentive Awards

The Authority is required no less often than annually to identify the net revenues produced by the sale of EP, and further to identify an amount of the net revenues from the sale of EP that will be used for Industrial Incentive Awards. See PAL § 1005 (eight undesignated paragraph). “Net revenues” is defined to mean “any excess of revenues properly allocated to the sales of expansion power over costs and expenses properly allocated to such sales.”

For the year ending December 31, 2024, \$6.6 million in net revenues were produced by the sale of EP. In 2024, \$1,000,000 of net revenues were paid out for Industrial Incentive Awards.

F. Western New York Economic Development Fund

The Western New York Economic Development Fund (“WNYED Fund”) was created by Chapter 58 (Part GG) of the Laws of 2012 to support economic development in Western New York. The Fund created, and administered by the Authority, is funded with the aggregate excess of revenues received by NYPA from the sale of EP and RP produced at NYPA’s Niagara Power Project that was sold in the wholesale energy market over what revenues would have been received had such power been sold on a firm basis to an eligible EP or RP customer (defined in the statute as “net earnings”).

As noted in the introduction to this Report, NYPA is required to include in this Report an accounting for the subject reporting year that provides (1) the amount of EP and RP sold into the wholesale market, and (2) the “net earnings” paid into the WNYED Fund for the reporting year.

The amount of EP and RP sold into the wholesale market for the 2024 period totaled 1,840,853 megawatt-hours. As of December 31, 2024, the Authority had deposited a total of \$92,105,314 into the Fund since inception of the program.

G. Northern New York Economic Development Fund

The Northern New York Economic Development Fund (“NNYED Fund”) was created by Chapter 545 of the Laws of 2014 to support economic development in Northern New York. It consists of a fund, known as the “Northern New York Economic Development Fund,” created and administered by the Authority. It is funded with the aggregate excess of revenues received by the Authority from the sale of energy associated with “St. Lawrence County economic development power” sold by the Authority in the wholesale energy market over what revenues would have been received had such energy been sold on a firm basis under a contract between the Authority and the Town of Massena Electric Department (defined in the statute as “net earnings”).

As noted in the introduction to this Report, NYPA is required to include in this Report an accounting for the subject reporting year that provides (1) the amount of St. Lawrence County economic development power sold into the wholesale market by the Authority, and (2) the “net earnings” paid into the NNYED Fund for the reporting year.

The amount of power sold into the wholesale market for the 2024 period totaled 61,488 megawatt-hours. As of December 31, 2024, the Authority had deposited a total of \$9,701,164 into the Fund since inception of the program.

H. Cost to Provide Economic Development Power Programs

The Authority incurs no net costs from the RNY, RP, EP and PP power programs, as its costs are recovered in the rates paid to the Authority by the program participants.

New York Power Authority ReCharge New York Allocations as of December 31, 2024
