System Impact Study Status

The System Impact Study Final Report (“SIS”) for the Marcy South Series Compensation Project (NYISO Queue #380), dated April 2013, was approved on May 20, 2013 by the NYISO Operating Committee. The SIS included steady state power flow (thermal and voltage), transfer limits, stability, extreme contingency as well as short circuit analysis and concluded that MSSC would have no significant adverse impact on the New York control area.
