

POWER AUTHORITY OF THE STATE OF NEW YORK

2012 REPORT TO THE GOVERNOR AND LEGISLATIVE LEADERS ON POWER PROGRAMS FOR ECONOMIC DEVELOPMENT

Power Authority of the State of New York

John R. Koelmel, Chairman

Terrance P. Flynn

Jonathan F. Foster

R. Wayne LeChase

Joanne M. Mahoney

Eugene L. Nicandri

April 2013

Introduction

This “2012 Report to the Governor and Legislative Leaders on Power Programs for Economic Development” (“Report”) is submitted by the Power Authority of the State of New York (the “Authority” or “NYPA”) pursuant to Public Authorities Law (“PAL”) §§ 1005(14), (18) and (23).

Subdivision 14 directs the Power Authority:

14. To provide to the governor, to the speaker of the assembly, and to the temporary president of the senate, on or before April first of each year, an economic development report including projections for the next succeeding twelve months of the amount of economic development power which will be or is expected to be available with a listing of the current recipients of that power, and data on the number and types of jobs resulting from allocation of economic development power. Such report shall also include the amount of revenues collected and used in the previous calendar year pursuant to the eighth unnumbered paragraph of this section.

Subdivision 18 provides:

18. For the purpose of furnishing the state with systematic information regarding the status and the activities of the authority, the authority shall submit to the governor, the temporary president of the senate, speaker of the assembly, the minority leader of the senate and the minority leader of the assembly, within ninety days after the end of its fiscal year, a complete and detailed annual report on each economic development power program it administers. Such annual report shall include, but not be limited to, the following information:

a. the number of recipients of economic power program benefits, the economic region in which each recipient is located, the type and amount of assistance provided, megawatts of power awarded, length of current contract, current contract compliance status, last audit, number of jobs retained and/or added in the fiscal year, approximate energy efficiency savings and amount of power reallocated from previous years due to forfeited benefits; and

b. cost to the authority to provide economic development power programs during the previous fiscal year.

Finally, subdivision 23 provides:

23. The authority shall include in the annual report prepared pursuant to subdivision eighteen of this section, an accounting for the subject year that provides (a) the amount of expansion power and replacement power sold into the wholesale market by the authority, and (b) the net earnings, as such term is

defined in section one hundred eighty-nine-a of the economic development law, paid into the western New York economic development fund.¹

¹ By its own terms, subdivision 14 is applicable only to the Authority's "Economic Development Power" program, whereas subdivision 18 applies to each of the Authority's economic development power programs. To simplify the presentation, the Authority has combined the reporting requirements of subdivisions 14 and 18 and reports on these requirements for each program to the extent it has such information.

A. Recharge New York Power Program

- Program Details

Chapter 60 (Part CC) of the Laws of 2011 (“Chapter 60”) created the Recharge New York (“RNY”) Power program. The RNY Power program makes 910 megawatts (“MW”) of “Recharge New York Power” (“RNY Power”) available to “eligible applicants” for the purpose of attracting new businesses and retaining and expanding existing businesses throughout the State of New York.

The RNY Power resource is comprised of: (1) fifty percent (50%) of firm hydroelectric power from the Authority’s Niagara and Saint Lawrence-FDR hydroelectric projects (“RNY Hydropower”) that was withdrawn, effective August 1, 2011, from the utility corporations that had purchased such power for the benefit of domestic and rural consumers; and (2) fifty percent (50%) of power procured by the Authority through market sources, a competitive procurement process, or Authority sources (other than the Niagara and Saint Lawrence projects) (collectively, “RNY Market Power”).

Pursuant to Chapter 60, the Authority is authorized, beginning July 1, 2012, to “make available, contract with and sell” to eligible applicants such RNY Power allocations as are recommended by the Economic Development Power Allocation Board (“EDPAB”). RNY allocations consist of equal parts of RNY Hydropower and RNY Market Power.

Pursuant to Chapter 60 and by order of the NYS Public Service Commission, the State’s retail utilities are required to deliver RNY Power at a discount. In essence, the discount derives from exempting RNY Power from the Renewable Portfolio Surcharge and the Systems Benefit Charge, including the Energy Efficiency Portfolio Standard surcharge.

The delivery discount applies to a Customer’s total RNY Power allocation even if the Customer decides to purchase the RNY Market Power component of its allocation from a non-NYPA source. If a customer declines to purchase RNY Market Power from the Authority, the Authority has no responsibility for supplying such power to the customer for the term of the allocation.

- Projected Availability

As of December 31, 2012, a balance of 179.9 MW of RNY Power was available for allocation to eligible applicants.

- Current Allocations

As of December 31, 2012, 731 allocations of RNY Power had been approved by the Authority for 687 eligible applicants totaling 730.1 MW. All current RNY Power awards, including recipient name, location, region, MW of power awarded, length of current contract, and total number of jobs committed to be retained or added are listed in Exhibit I to this Report.

Allocations of RNY Power commenced in fiscal year 2012. At the end of 2012, the RNY Power program was supporting the retention and/or creation of 387,798 jobs.²

Given that the RNY Power program is new, the following information cannot be reported on for the 2012 reporting year: current contract compliance status, last compliance review, approximate energy efficiency savings and the amount of power reallocated from previous years due to forfeited benefits. This information will be included in future Annual Reports as the Authority begins its compliance review in 2013.

B. Expansion Power³

- Program Details

Under PAL § 1005(13), the Authority is authorized to contract to allocate or reallocate directly, or by sale for resale, 250 MW of firm hydroelectric power as “Expansion Power” (“EP”) to eligible businesses in the State located within 30 miles of the Niagara Power Project, provided that the amount of Expansion Power allocated to businesses in Chautauqua County on January 1, 1987 continues to be allocated in such county.

- Projected Availability

As of December 31, 2012, a balance of 10.55 MW of EP was available for reallocation to eligible businesses.

² These numbers may not reflect commitments made by applicants to create new jobs where such jobs are linked to capital investments (*e.g.*, new or expanded facilities, expanded operations) that have not yet been completed or made operational.

³ The job numbers referred to in this section may not reflect: (1) all jobs added or lost during the reporting year, because NYPA’s compliance reviews for such year are not completed until after the required reporting date; or (2) commitments made by applicants to create new jobs in exchange for new or extended allocations awarded during the reporting year or prior years where such commitments relate to new or expanded facilities or operations that have not yet been completed or made operational.

- Current Allocations

As of December 31, 2012, 104 allocations of EP had been approved by the Authority to 79 companies totaling 239.45 MW. All current EP allocations, including recipient name, location, region, MW of power awarded, length of current contract, current contract compliance status and total number of jobs committed to be retained and/or added are listed in Exhibit II to this Report.

At the end of the 2011 fiscal year, the EP program was supporting the retention of 23,446 jobs. As a result of new or extended allocations awarded in 2012, 1,323 retained or created jobs were added under the EP program. Additionally, 164 jobs dropped out of the EP program due to allocation reductions, terminations or withdrawals in 2012. Therefore, as of the end of the 2012 fiscal year, the EP program was supporting a total of 24,605 jobs.

- Compliance Information

The Authority conducts a compliance review annually. Customer compliance status is listed in Exhibit II to this Report. The statute authorizing this program does not require a program participant to establish energy efficiency savings in connection with an allocation. Therefore, the Authority is unable to report on this specific information.

- Forfeiture and Reallocation

The amount of power forfeited during the previous reporting year (2011) for non-compliance or other reasons is approximately 18,575 kW.⁴

It is not possible to identify precisely what portion of 2011 forfeited power was reallocated in 2012 because at any given time there is always some amount of unallocated power. Comparing the total amount of power allocated as of the close of the reporting year with the total amount of power allocated as of the close of the previous year may provide a rough indication of allocation trends although such information may not account for changes in allocation levels that occur within a particular reporting year.

⁴ For purposes of this report, the Authority is interpreting the term “forfeited” to mean any instance of surrender of previously-allocated power whether due to non-compliance, a lack of need for any portion of an allocation, reduction in the business operations of a customer, or some other reason.

C. Replacement Power⁵

- Program Details

“Replacement Power” (“RP”) consists of 445 MW of firm hydropower generated by the Authority at its Niagara Project in accordance with PAL § 1005(13). To qualify for RP a business must have facilities for the receipt of RP located within 30 miles of the Authority’s Niagara Power Project and otherwise meet the criteria set forth in PAL § 1005(13).

- Projected Availability

As of December 31, 2012, a balance of 26.8 MW of RP was available for reallocation to eligible businesses.

- Current Allocations

As of December 31, 2012, 126 allocations of RP had been approved by the Authority to 78 companies totaling 418.2 MW. All current RP allocations, including recipient name, location, region, MW of power awarded, length of current contract, current contract compliance status and total number of jobs committed to be retained and/or added are listed in Exhibit III to this Report.

At the end of the 2011 fiscal year, the RP program was supporting the retention of 14,086 jobs. There were no new or extended allocations awarded in 2012, and therefore no retained or created jobs were added under the RP program. Additionally, 99 jobs dropped out of the RP program due to allocation reductions, terminations or withdrawals in 2012. Therefore, as of the end of the 2012 fiscal year, the RP program was supporting a total of 13,987 jobs.

- Compliance Information

The Authority conducts a compliance review annually. Customer compliance status is listed in Exhibit III to this Report. The statute authorizing this program does not require a program participant to establish energy efficiency savings in connection with an allocation. Therefore, the Authority is unable to report on this specific information.

⁵ The job numbers referred to in this section may not reflect: (1) all jobs added or lost during the reporting year because NYPA’s compliance reviews for such year are not completed until after the required reporting date; or (2) commitments made by applicants to create new jobs in exchange for new or extended allocations awarded during the reporting year or prior years where such commitments relate to new or expanded facilities or operations that have not yet been completed or made operational.

- Forfeiture and Reallocation

The amount of power forfeited during the previous reporting year (2011) for non-compliance or other reasons is approximately 13,275 kW.

It is not possible to identify precisely what portion of 2011 forfeited power was reallocated in 2012 because at any given time there is always some amount of unallocated power. Comparing the total amount of power allocated as of the close of the reporting year with the total amount of power allocated as of the close of the previous year may provide a rough indication of allocation trends although such information may not account for changes in allocation levels that occur within a particular reporting year.

D. Preservation Power⁶

- Program Details

Chapter 313 of the Laws of 2005 established the “Preservation Power” (“PP”) program relating to allocations of hydropower within the counties of Jefferson, St. Lawrence and Franklin Counties from quantities sold to Alcoa and GM Powertrain from the St. Lawrence-FDR Power Project. The PP program is comprised of 490 MW, including 478 MW of firm and interruptible hydropower currently sold to Alcoa.

- Projected Availability

As of December 31, 2012, 11 MW of PP had been relinquished by The Racer Trust, formerly GM Powertrain. Of the 11 MW, 1.7 MW of Preservation Power was available for allocation to eligible businesses.

- Current Allocations

As of December 31, 2012, six allocations of PP to five companies had been approved by the Authority totaling 488.3 MW. All current PP allocations, including recipient name, location, region, MW of power awarded, length of current contract, current contract compliance status and total number of jobs committed to be retained and/or added are listed in Exhibit IV to this Report.

At the end of the 2011 fiscal year, the PP program was supporting the retention of 1,065 jobs. There were no new or extended allocations awarded in 2012, and therefore no retained or created jobs were added under the PP program. Additionally, no jobs dropped

⁶ The job numbers referred to in this section may not reflect: (1) all jobs added or lost during the reporting year because NYPA’s compliance reviews for such year are not completed until after the required reporting date; or (2) commitments made by applicants to create new jobs in exchange for new or extended allocations awarded during the reporting year or prior years where such commitments relate to new or expanded facilities or operations that have not yet been completed or made operational.

out of the PP Program due to allocation reductions, terminations or withdrawals in 2012. Therefore, as of the end of the 2012 fiscal year, the PP program was supporting a total of 1,065 jobs.

- Compliance Information

The Authority conducts a compliance review annually. Customer compliance status is listed in Exhibit IV to this Report. The statute authorizing this program does not require a program participant to establish energy efficiency savings in connection with an allocation. Therefore, the Authority is unable to report on this specific information.

- Forfeiture and Reallocation

No power was forfeited during the previous reporting year (2011) for non-compliance or other reasons.

E. Power for Jobs

- Program Details

Chapter 316 of the Laws of 1997 established the Power for Jobs (“PFJ”) program to provide low-cost power to businesses and not-for-profit corporations that agreed to retain or create jobs in New York State. In return for commitments to create or retain jobs, successful applicants initially received three-year contracts for electricity under the program. Various succeeding enactments provided for the expansion and extensions of the PFJ program.

Chapter 60 (Part CC) of the Laws of 2011, which created the RNY Power program, extended the PFJ program through June 30, 2012 after which the PFJ program expired. As a result, no PFJ allocations currently exist.

Many former PFJ customers who did not receive a RNY Power allocation qualified to receive a “Transitional Electric Discount” (“TED”), a temporary program created by Chapter 60 to help mitigate the impact of the expiration of the PFJ program. Section I of this Report summarizes the TED program. Exhibit VI to this Report details the former PFJ customers who are currently participating in the TED program.

F. Economic Development Power

- Program Details

Economic Development Power (“EDP”) consists of power that is voluntarily relinquished by businesses to the authority, except that it does not include any power from NYPA’s Niagara or Saint Lawrence-FDR power projects or any power under the PFJ program

which may be voluntarily relinquished by businesses, small businesses, and not-for-profit corporations.

In accordance with Chapter 313 of the Laws of 2005, existing EDP customers were eligible, and had been approved for, the rate moderation provided by the Energy Cost Savings Benefit (“ECSB”) program. The ECSB program expired as of June 30, 2012. As a result, the EDP program no longer provides a meaningful benefit compared to other market-based power sources. Consequently, the EDP program is no longer viable and all EDP contracts and allocations have expired.

Many former ECSB recipients who did not receive a RNY Power allocation qualified to receive a transitional discount under the TED program discussed above. Exhibit VI to this Report details the former EDP customer that are currently participating in the TED program.

G. High Load Factor Power

- Program Details

The High Load Factor Power (“HLF”) program provided for the allocation of 96.25 MW of power to energy-intensive industries throughout the state. Eligibility for the program has been limited to expanding industries demonstrating that electricity costs were equal to at least 7.5% of product costs, an electric load of 5 MW or greater and demand of 540 kilowatts/month or greater.

HLF customers were eligible, and had been approved, for the rate moderation provided by the ECSB program. As noted above, the ECSB program terminated as of June 30, 2012. As a result, the HLF program no longer provides a meaningful benefit compared to other market-based power sources. Consequently, all but four HLF allocations have expired.

- Current Allocations

As of December 31, 2012, four allocations of HLF power to three companies had been approved by the Authority totaling 33.3 MW. All HLF allocations are listed in Exhibit V to this Report.

H. Municipal Distribution Agency Power

- Program Details

The Municipal Distribution Agency (“MDA”) power program authorized the allocation of 96 MW for downstate municipal distribution agencies (New York City Public Utility Service Agency; the Westchester County Public Utility Agency; the Nassau County Public Utility Agency and the Suffolk County Public Utility Agency).

Like EDP and HLF allocations, MDA power allocations were eligible and approved for ECSB. As noted above, the ECSB program terminated as of June 30, 2012. Consequently, all MDA power allocations and contracts have now expired.

- Current Allocations

Exhibit VI to this Report details all former MDA customers who are currently participating in the TED program.

I. Transitional Electricity Discounts

Section 6 of Chapter 60 (Part CC) of the Laws of 2011 authorized the provision of “transitional electricity discounts” to RNY Power applicants who (1) at the time were in substantial compliance with all contractual commitments and receiving benefits under the PFJ, ECSB, EDP, HLF or MDA programs, but (2) do not receive a recommendation from EDPAB for a RNY Power allocation. Specifically, Section 6 provides:

§ 6. Transitional electricity discount. Notwithstanding any provision of title 1 of article 5 of the public authorities law or article 6 of the economic development law to the contrary, with respect to applicants who are in substantial compliance with all contractual commitments and receiving benefits under the power for jobs, energy cost savings benefit, economic development, high load factor or municipal distribution agency programs, but do not receive a recommendation from the New York state economic development power allocation board for a recharge New York power allocation pursuant to section 188-a of the economic development law, such board shall recommend that the power authority of the state of New York provide for a transitional electricity discount to such applicants. The power authority of the state of New York is authorized, as deemed feasible and advisable by the trustees, to provide such transitional electricity discounts as recommended by the New York state economic development power allocation board. The power authority of the state of New York shall identify and advise such board whether sufficient funds are available for the funding of such transitional electricity discounts through June 30, 2016. The amount of the transitional electricity discount for the period July 1, 2012 through June 30, 2014 shall be equivalent to 66 percent of the unit (per kilowatt-hour) value of the savings received by the applicant under the power for jobs or energy cost savings benefit programs during the 12 months ending on December 31, 2010. The amount of the transitional electricity discount for the period July 1, 2014 through June 30, 2016 shall be equivalent to 33 percent of the unit (per kilowatt-hour) value of the savings received by the applicant under the power for jobs or energy cost savings benefit programs during the 12 months ending on December 31, 2010.

Participants in former NYPA programs who are receiving benefits under the TED program are identified in Exhibit VI to this Report.

J. Expansion Power Net Revenues for Industrial Incentive Awards

The Authority is required no less often than annually to identify the net revenues produced by the sale of EP, and further to identify an amount of the net revenues from the sale of EP that will be used for Industrial Incentive Awards. *See* PAL § 1005 (eight undesignated paragraph). “Net revenues” is defined to mean “any excess of revenues properly allocated to the sales of expansion power over costs and expenses properly allocated to such sales.”

For the year ending December 31, 2012, \$8,314,000 in net revenues produced by the sale of EP. In 2012, \$6,876,952 of net revenues was paid out in Industrial Incentive Awards.

K. Western New York Economic Development Fund

The Western New York Economic Development Fund (“Fund”) was created by Chapter 58 (Part GG) of the Laws of 2012 to support economic development in Western New York. It consists of a fund, known as the “Western New York Economic Development Fund” (“Fund”), created and administered by the Authority. It is funded with the aggregate excess of revenues received by NYPA from the sale of EP and RP produced at NYPA’s Niagara Power Project that was sold in the wholesale energy market over what revenues would have been received had such power been sold on a firm basis to an eligible EP or RP customer (defined in the statute as “net earnings”).

As noted in the introduction to this Report, NYPA is required to include in this Report an accounting for the subject year that provides (1) the amount of EP and RP sold into the wholesale market, and (2) the “net earnings” paid into the Fund for the reporting year.

The amount of EP and RP sold into the wholesale market for 2012 period totaled 1,176,314 megawatt-hours. As of December 31, 2012, the Authority deposited a total of \$18,086,942.39 into the Fund.

L. Cost to Provide Economic Development Power Programs

The Authority incurs no net costs from the RNY, RP, EP and PP power programs, as its costs are recovered in the rates paid to the Authority by the program participants. However, for the PFJ program, the Authority incurred \$29.4 million in costs during 2012 attributable to rebate payments made to participating customers relating to the period of 2012 prior to PFJ program expiration.
